Operational Excellence Manager, Crane Energy Belfast

## Claire Moore

**BEng Aeronautical Engineering - Queens University Belfast, 2001**

**MSc Business Improvements - University of Ulster, 2012**

Claire has been the Operational Excellence Manager for Crane Energy in Belfast since 2012. Crane is a diversified manufacturer of highly engineered industrial products. Founded in 1855, they provide products and solutions to customers in several market sectors including aerospace, electronics, hydrocarbon processing, petrochemical, chemical, power generation, automated merchandising and transportation.

Crane Energy has been operating in Belfast since 1955, making and selling non-return check valves to a worldwide market. Claire is responsible and accountable for driving continuous improvements throughout the production facility in Belfast. This requires a thorough understanding of technical requirements enabling Crane to deliver more effectively on customer expectations thereby allowing the business to drive profitable growth.

Claire has performed several roles within the company over a ten year period. She was a Technical Sales Engineer for 4 years and a Regional Project Leader also for 4 years.

Claire believes that to be successful in her industry “It is important to find something you enjoy and that challenges you at each step of your career”.
